Dear Mr. Cheney:

Acceptable certifications of closure for the hazardous waste pile at Fulton Industries have been received from the owner/operator (yourself) and an independent registered professional engineer (Mr. Glenn Fitkin, Bowser-Morner, Inc.). Also, Dave Ferguson of the OEPA NWDO has inspected the result of closure activities and found the waste pile to be closed in accordance with the approved closure plan.

Therefore, Fulton Industries is free to make use of the closed area as part of the facility's regular operations (not including hazardous waste management activities requiring a permit to treat, store or dispose of hazardous waste).

If you have any further questions, please call me at (614)462-6303.

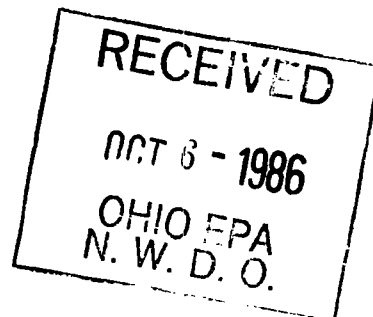

Sincerely,

Dan Fisher

from: Dave Ferguson, NWDO
subject: Waste Pile Closure at Fulton Industries; OHD094810736;
Wauseon (Fulton County)

On July 11, 1986, I visited Fulton Industries to inspect the Final Closure of their waste pile. Also present were Ned Griggs, Plant Manager, Tom Gleckler, Manager, Finishing Division, and Glenn Fitkin, P.E., Bowser-Morner. It is my opinion, based upon that visit, the analytical results, and the statistical evaluation, that the waste pile has been closed in accordance with the closure plan approved by the Ohio EPA in the Fall of 1985. The certification by an independent Professional Engineer was submitted by Glenn Fitkin, P.E., Bowser-Morner with the closure certification report on June 2, 1986.

RE: Closure Plan
Fulton Industries, Incorporated
OHD 094810736

Dear Mr. Cheney:

The United States Environmental Protection Agency (U.S. EPA) received a copy of the above referenced facility's closure plan on July 14, 1986. This plan was previously submitted to the Ohio Environmental Protection Agency (OEPA) on October 11, 1985. The plan concerned the closure of a waste storage pile containing (F006) electroplating wastes located at the facility.

The OEPA approved the plan conditionally in a letter dated June 13, 1986. The U.S. EPA concurs with the OEPA's review and approval with the conditions stipulated.

If you have any further questions, please contact Mr. Robert Swale of my staff, at (312) 886-6591.

Sincerely,

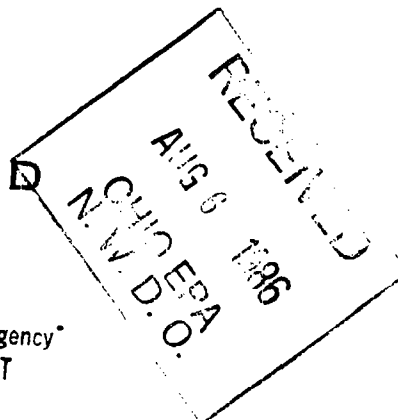

Karl E. Bremer, Chief

Dear Mr. Cheney:

Attached is information to aid you in completing the owner/operator closure certification of the hazardous waste facility at Fulton Industries. Certification must follow the signature requirements found in OAC 3745-50-42 and the certification statement must include wording as found in OAC 3745-50-42(D) (see attached). Please send the signed statement to Thomas E. Crepeau, DSHWM, Ohio EPA, P.O. Box 1049, Columbus, Ohio 43216-1049.

Thank you for your attention to this matter. Please call me at (614) 462-6303 if you have any questions.

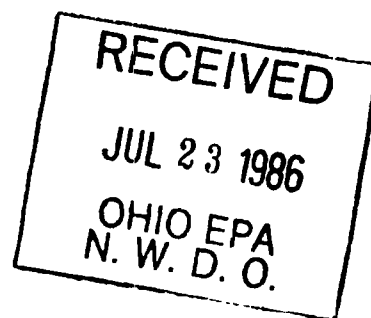

Sincerely,

CERTIFIED MAIL

June 13, 1986

Re: CLOSURE PLAN, FULTON INDUSTRIES
OHD094810736

Richard Cheney
Fulton Industries, Inc.
135 E. Linfoot Street
Wauseon, Ohio 43567

Mr. Cheney:

On July 21, 1985, Fulton Industries, Inc., submitted to Ohio EPA a closure plan for its hazardous waste storage pile located at 135 E. Linfoot Street, Wauseon, Ohio. Revisions to this closure plan were received on October 23, 1985. The closure plan was submitted pursuant to Rule 3745-66-12 of the Ohio Administrative Code (OAC) in order to demonstrate that Fulton Industries' proposal for closure complies with the requirements of OAC Rules 3745-66-11 and 3745-66-12.

The public was given the opportunity to submit written comments regarding the closure plan of Fulton Industries in accordance with OAC Rule 3745-66-12. No comments were received by Ohio EPA in this matter.

Based upon review of the company's submittal and subsequent revisions, I conclude that the closure plan for the hazardous waste facility at Fulton Industries meets the performance standard contained in OAC Rule 3745-66-11 and complies with the pertinent parts of OAC Rule 3745-66-12.

The closure plan submitted to Ohio EPA by Fulton Industries is hereby approved.

Please be advised that approval of this closure plan does not release Fulton Industries from any responsibilities as required under the Hazardous and Solid Waste Amendments of 1984 regarding corrective action for all releases of hazardous waste or constituents from any solid waste management unit, regardless of the time at which waste was placed in the unit.

Due to the fact that the Ohio EPA is not currently authorized to conduct the federal hazardous waste program in Ohio, your closure plan also must be reviewed and approved by USEPA. Federal RCRA closure regulations (40 CFR 265.112) require that you submit a closure plan to George Hamper, Chief, Waste Management Division, Technical Programs Section, Ohio Unit, USEPA, Region V, 5HW-13, 230 South Dearborn Street, Chicago, Illinois 60604. Approval by both agencies is necessary prior to commencement of activities required by the approved closure plan.

I certify this to be a true and accurate copy of the official document as filed in the records of the Ohio Environmental Protection Agency.

By: Virgil Davis Date 6/13/86

ENTERED DIRECTOR'S JOURNAL

JUN 13 1986

Mr. Cheney
Page Two
June 13, 1986

You are notified that this action of the Director is final and may be appealed to the Environmental Board of Review pursuant to Section 3745.04 of the Ohio Revised Code. The appeal must be in writing and set forth the action complained of and the grounds upon which the appeal is based. It must be filed with the Environmental Board of Review within thirty (30) days after notice of the Director's action. A copy of the appeal must be served on the Director of the Ohio Environmental Protection Agency and the Environmental Enforcement Section of the Office of the Attorney General within three (3) days of filing with the Board. An appeal may be filed with the Environmental Board of Review at the following address: Environmental Board of Review, 250 East Town Street, Room 101, Columbus, Ohio 43266-0557.

When closure is completed, the Ohio Administrative Code Rule 3745-66-15 requires the owner or operator of a facility to submit to the Director of the Ohio EPA certification by the owner or operator and a registered professional engineer that the facility has been closed in accordance with the approved closure plan. These certifications should be submitted to: Ohio Environmental Protection Agency, Division of Solid and Hazardous Waste Management, Attn: Thomas E. Crepeau, Manager, Data Management Section, P.O. Box 1049, Columbus, Ohio 43216-1049.

RE: Fulton Industries, Inc.
Our File No: F075/13581

Dear Mr. Crepeau:

In accordance with the requirements of Ohio Administrative Code Chapter 3745, Fulton Industries, Inc. submits the enclosed document, "Closure of Waste Pile Area, Fulton Industries, Wauseon, Ohio".

This document certifies that the site's closure was conducted in accordance with its approved closure plan and includes a description of the results of the site's soil survey. The analytical results for the soil at the location of the former facility are statistically comparable to those for background soil.

If you have any questions or if we may be of assistance, please contact the undersigned.

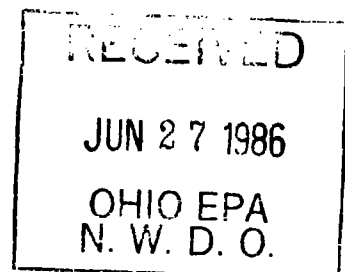

Very truly yours,

ATTN: Mr. Dave Ferguson

Dear Mr. Ferguson:

Confirming my telephone call to your office on May 6, 1986, we have completed the excavation of contaminated soil and it has been disposed of through Fondessey Enterprises.

After the excavation work was completed, samples of the soil were taken from the excavated areas, by a Bowser-Morner representative, for analysis. Analysis should be complete in approximately

*There have been 12
loads of soil taken out
@ Fulton.*

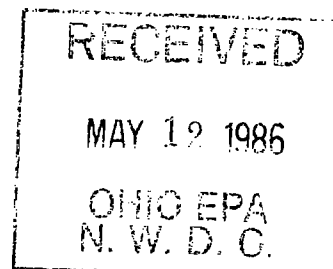

*Bowser/Morner have
taken samples of
what remains.*

*They expect results
of these sample in
a couple of weeks.*

Dear Mr. Cheney:

A public notice acknowledging the Ohio EPA's receipt of a closure plan for Fulton Industries in Wauseon, Ohio, will appear the week of October 27, 1985, in the Wauseon Republican. The Director of the Ohio EPA will act upon the closure plan request following the close of the public comment period, November 28, 1985.

Copies of the closure plan will be available for public review at the Wauseon Public Library, 117 East Elm Street in Wauseon and the Ohio EPA, Northwest District Office, 1035 Devlac Grove Drive, Bowling Green, Ohio.

Please contact James F. Flautt at (614) 466-1578 if you have any questions concerning this matter.

RE: Fulton Industries, Inc.
Our File No: F075/13581

O
Gentlemen:

P
We represent Fulton Industries, Inc. (hereinafter "Fulton") in Wauseon, Ohio, which received your letter requesting information relating to corrective action waste or waste constituents from solid waste management units outlined below, it appears that Fulton should have responded to your letter. Nevertheless, the company has provided the information relating to your request.

Y
After discussions with company officials and in order to understand the following to describe the situation at the Wauseon facility. In 1980, Fulton had on its premises an electroplating sludge. (With the exception of an electroplating treatment unit permitted pursuant to the Ohio NPDES program, Fulton does not have other types of solid waste management units.) In 1980, the EPA, the company submitted to the U.S. EPA an application for a permit. The facility has not been operated as a TSD, and no waste TSD permit was applied for or issued. The company's concern; it did not consider itself to be a hazardous waste management unit "seeking a permit" under subtitle C of the Resource Conservation and Recovery Act of 1976.

There are no "regulated units" on Fulton's premises that were deposited on the pile after July 26, 1982. In fact, the waste was removed and disposed of in a licensed commercial hazardous waste facility prior to that date.

On several occasions plant personnel have contacted the EPA officials regarding how to have Fulton removed from the site. Each time the company has received a promise from the EPA back to Fulton with the necessary information, but that information has not been received.

Ohio Environmental Protection Agency

March 17, 1986

Page 1

Fulton officials also met with Ohio EPA and, on July 18, 1985, submitted a closure plan. During the fall of 1985, it was revised in accordance with the Ohio EPA's suggestions, and was ultimately approved.

Fulton has interviewed certain long-standing employees, performed soil sampling, and subsequently identified two areas on the premises which were contaminated by electroplating sludge from the facility. The contaminated soil this spring when the ground work will be performed pursuant to the closure plan. The work will be supervised by an independent professional engineer. The sludge will be processed through Ohio's waste product management system. Ohio EPA is expected to be disposed of in a permitted facility.

If you require any further assistance, please do not hesitate to contact me.

Sincerely,
